SPC GRANTS AWARDED 2026

IN AGREEMENT WITH Local Government Act 1972 Section 137

In reviewing the grant submission requests, Council followed its set criteria of assessing grants. Priority is given to those grant requests where:

- the Council owns the assets;
- the organization requesting the grant provides a valuable contribution to the community and is wholly or largely reliant on the grant to continue to provide services to the parish, or the size of the grant they requested was small.
- those organisations either operated on a commercial basis or had other reasonably significant sources of income. Council recognises a number of organisations falling into this latter category also provide a valuable contribution to the community. As such, it was felt the most equitable approach was to allocate half of the original grant request to these organisations, so enabling the Council to provide some financial support to the organisations in this category.

This approach enables the Council to provide funding either in full or part of all the applications received, whilst remaining within the budget allocated for grants to be awarded during the 2025-26 financial year. The allocation of next year's grant applications is also against a backdrop of significant woodland management expenditure for next and subsequent years which has also impeded on the grant funding available.
